

DEPARTMENT OF THE ARMY
SOUTH PACIFIC DIVISION, CORPS OF ENGINEERS

333 Market Street, Room 923
San Francisco, California 94105-2195

REPLY TO
ATTENTION OF:

Office of the Division Commander

Dear Sir or Madam:

The U.S. Army Corps of Engineers will hold its Infrastructure Systems Conference in Reno, Nevada from August 14-16, 2001 at the Reno Hilton Hotel. Conference attendees will include more than 550 electrical, mechanical, structural and geotechnical engineers from both military and civil works Corps offices world-wide. The theme of the conference will be "Maintaining Technical Excellence" and will include topics of interest to both the construction and design functions.

As part of the conference, we are including technical presentations and displays to showcase the latest technological applications in the design and construction industry. We would like to invite you to participate by presenting technical presentations and/or product displays.

Technical presentations and displays will be selected based on their interest to the conferees, relevance to our design and construction roles and available space. If you are interested in participating, please provide a brief description of your proposed technical presentation or display (or both) along with the requirements for space. Our tentative schedule calls for display areas to be available for set up at noon on Monday, August 13, with the conference scheduled to adjourn at noon on August 16. The display area will be offered without cost but there will be a conference registration fee of less than \$200 per person.

We ask that your response reach our office not later than June 15, 2001. My point of contact for this event is Mr. Albert Sidhom who can be reached at (415) 977-8116. I look forward to having you join us for this technical conference.

Sincerely,

A handwritten signature in black ink, reading "Peter T. Madsen", is positioned above the printed name.

Peter T. Madsen
Brigadier General, U.S. Army
Division Engineer
